A fast and eager learner, I am detail oriented and adapt to changing project requirements quickly to meet business goals. Comfortable with ambiguity and thrive in fast-paced environment.

EXPERIENCE

Senior IT Product Manager

Blueline Games | 2019 - Present | San Francisco, CA

Blueline Games is a multi-play mobile game app development firm that has successful titles such as Drift Something, Trivia Tonight and King's Fight.

- Assisted software sales cycle by 100% by designing and implementing customer acquisition platform for training and managing technical sales personnel.
- Established and executed strategic partnerships with 6 out of 10 top state manufacturing companies which resulted in \$20M additional annual revenue.
- Lead re-worked effort of a core SaaS product to reduce the platform deployment time for clients by 2 months.

ACHIEVEMENTS

Cost Saving Of \$100M

Through efficient project management and teamwork, the team saved the client at least over \$100 Million in the engine assembly department. The new assembly process is being rolled out to other departments to reduce further savings.

Exceeded throughput target by 90%

Cutting loading time & fixing key security issues by moving key service workers successfully online at scale. Managed the workforce to continuously create content for remote learning.

Business Generation

Discovered new clients, negotiated over \$5 Million of partnership and product deals with key customers based on insights gathered in product development phase.

MY TIME

Project Manager

Task

Task is an electric vehicle manufacturer that is revolutionizing the automobile industry.

2012 - 2019 | Los Angeles, CA

Physiology

In appearance, it reminds one of kikimores, but with a much larger size. Darker shades and more legs. Besides eyes, which allow them to see in the dark to catch their prey.

Although they are bigger, they are lighter in weight, which gives them greater

agility, and, combined with certain substances they secrete, they are able to move around in places such as walls and ceilings.

Abilities

- **Spider Physiology:** **Utukku** as a type of arahnid possess the traits, attributes and/or abilities of a spider: an air-breathing arthropods that have eight legs, chelicerae with fangs generally able to inject venom, and spinnerets that extrude silk.
- **Appendage Generation:** **Utukku** has more limbs than a human with four pairs of legs like most spiders.

Behavior

Like other monsters of its kind. They attend to "nest" behavior. In the desert, they usually go by themselves and share their prey with the rest of the nest. Leaving the best parts to Utukku Queen. To catch their prey, apart from their physical strength, they also use poison, which they secrete from their huge mouth.

Trivia

- The **School of the Spider**, was also known for a time, as the School of the Utukku.
